Data Visualization with Power BI and Tableau

Practical – VI

Roll No.: T001	Name: Soham Acharekar
Class: TYIT	Batch: 01
Date of Assignment: 21/08/2026	Date/Time of Submission: 21/08/2026

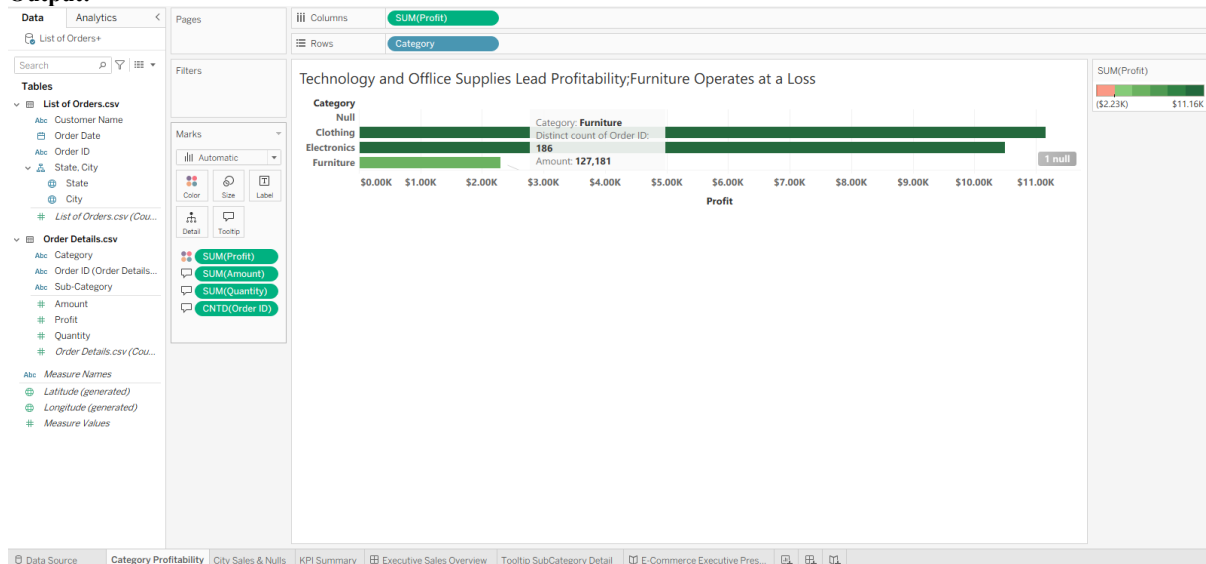

Dataset: Indian E-Commerce Data

a) Apply Worksheet-Level and Workbook-Level Formatting

Steps:

1. Connect List of Orders.csv and Order Details.csv in Tableau using Order ID.
2. Create a worksheet named **Category Profitability**.
3. Drag Category → Rows and Profit → Columns.
4. Go to Format → **Workbook** and set common fonts and grid lines.
5. Use Format → Font/Borders/Lines to format the worksheet.

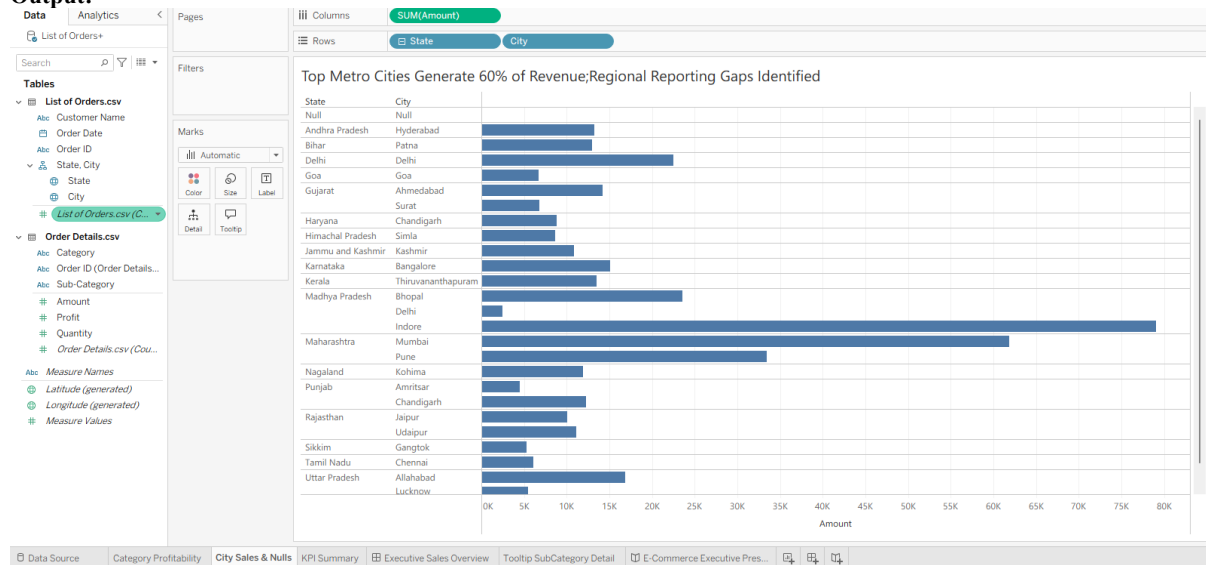

Output:

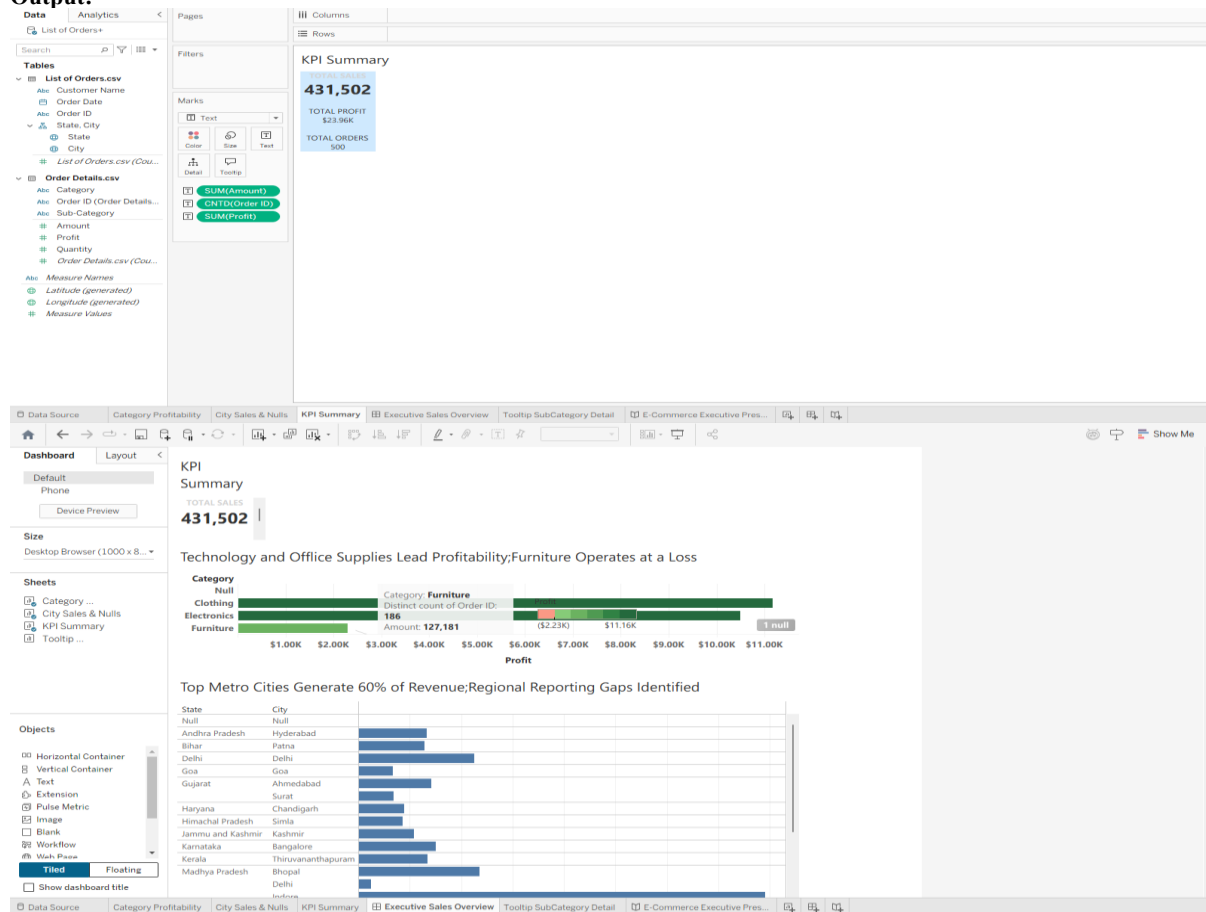

b) Customize Number, Date, and Null Value Formatting

Steps:

1. Right-click Profit → Default Properties → Number Format.
2. Select **Currency (Custom)** and use ₹ as the prefix.
3. Repeat for Amount.
4. Right-click Order Date → Default Properties → Date Format.
5. Set format to dd-MMM-yyyy.
6. Create **City Sales & Nulls** worksheet.
7. Display State, City and Amount.
8. Replace NULL values with **N/A** or **Not Reported**.

Output:**c) Design Effective Color Schemes and Layouts****Steps:**

1. Open **Category Profitability**.
2. Drag Profit → Color.
3. Select **Edit Colors**.
4. Choose a **Diverging Color Palette** and set the center to 0.
5. Create **KPI Summary** worksheet.
6. Add Amount, Profit and Order ID as KPI values.
7. Create **Executive Sales Overview** dashboard.
8. Arrange KPI Summary, Category Profitability and City Sales & Nulls using containers.

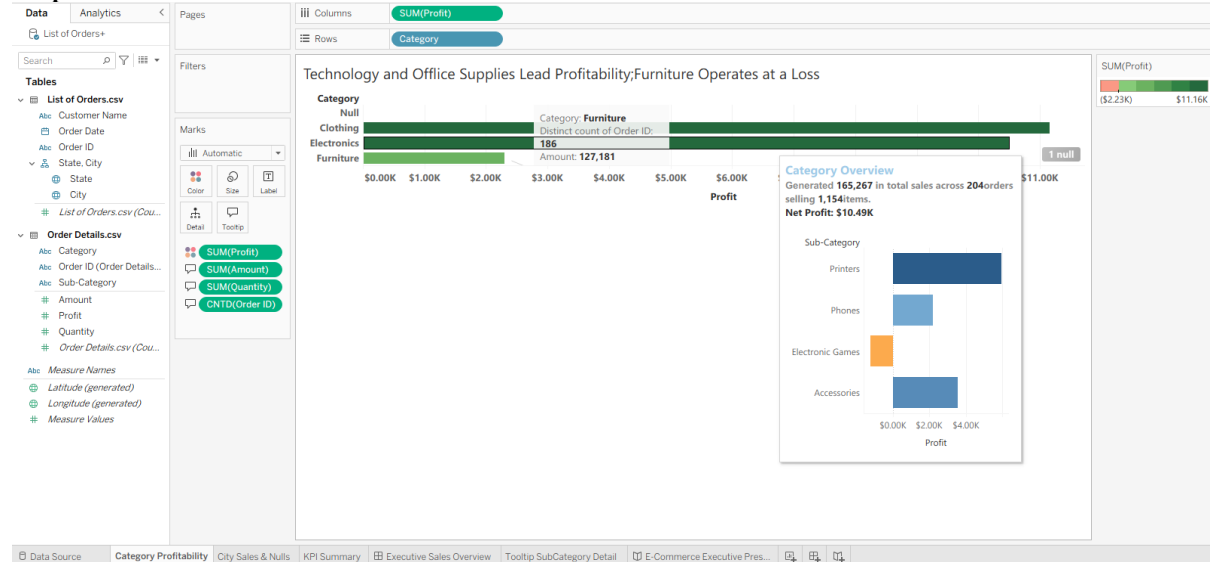

Output:

d) Create Informative Tooltips

Steps:

1. Open **Category Profitability**.
2. Click **Tooltip** on the Marks card.
3. Add Amount, Quantity and Order ID.
4. Edit the tooltip using meaningful text.
5. Display Sales, Orders, Quantity and Profit.
6. Test the tooltip by hovering over a category.

Output:

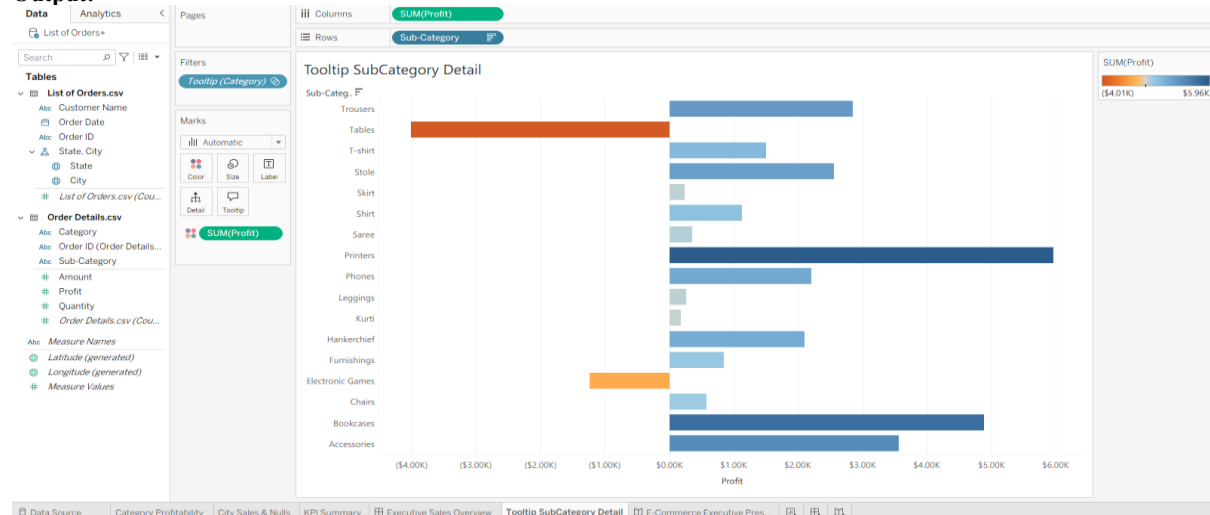

e) Implement "Viz in Tooltip"

Steps:

1. Create a worksheet named **Tooltip SubCategory Detail**.
2. Drag Sub-Category → Rows.
3. Drag Profit → Columns and Color.
4. Open the **Category Profitability** → **Tooltip**.
5. Select Insert → Sheets → **Tooltip SubCategory Detail**.
6. Set suitable width and height.
7. Hover over a category to view the detailed chart.

Output:

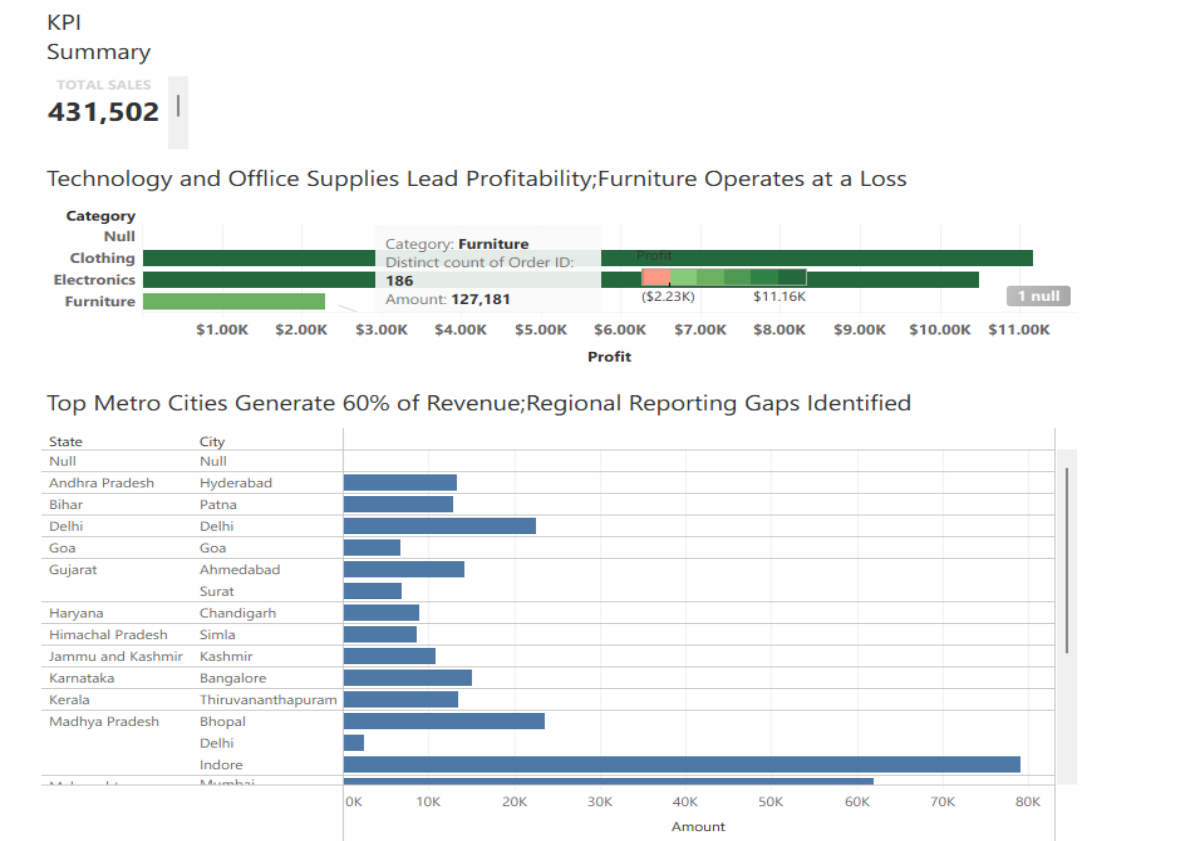

f) Improve Readability and User Experience

Steps:

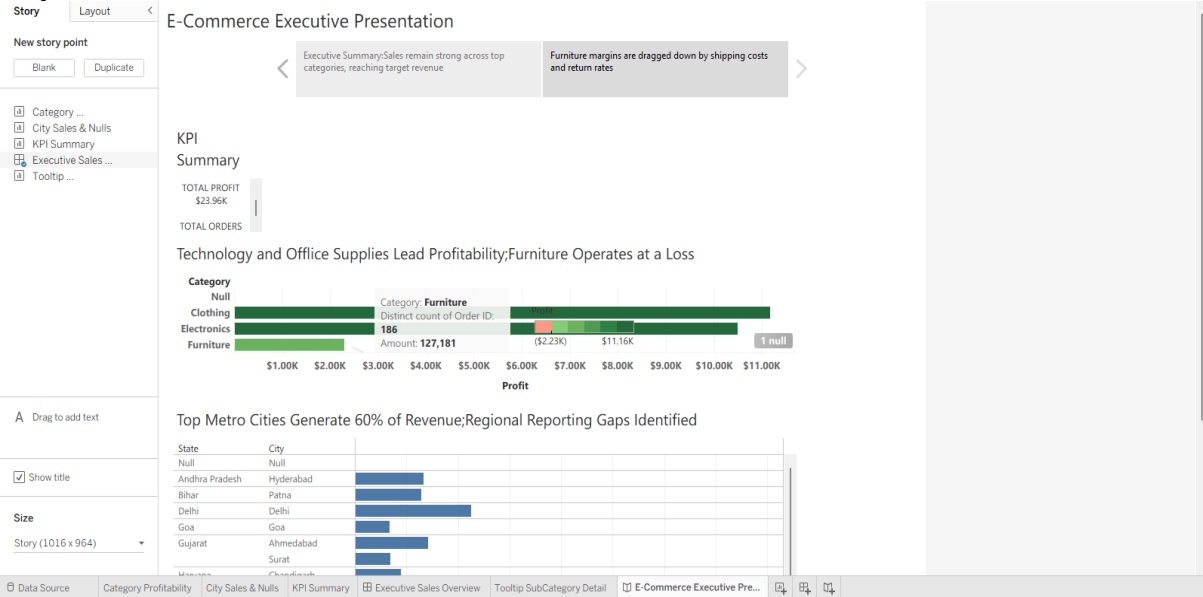

1. Open **Executive Sales Overview**.
2. Apply suitable **Outer Padding** to dashboard sheets.
3. Go to Dashboard → Actions → **Highlight**.
4. Create **Highlight Category across Dashboard** action.
5. Remove unnecessary legends and floating elements.
6. Check fonts, ₹ formatting, tooltips and highlighting.
7. Use **Presentation Mode** to test the dashboard.

Output:

- g) Apply Best Practices for Visual Storytelling
- Steps:
1. Arrange the dashboard using the **F-pattern** layout.
 2. Keep **KPI Summary** at the top.
 3. Place **Category Profitability** in the middle.
 4. Place **City Sales & Nulls** at the bottom/right.
 5. Replace normal titles with **action-oriented titles**.
 6. Add an annotation to an important profit/loss bar.
 7. Create a Tableau Story named **E-Commerce Executive Presentation**.
 8. Add two Story Points with appropriate captions.

Output:

Data Source

Category Profitability

City Sales & Nulls

KPI Summary

Executive Sales Overview

Tooltip SubCategory Detail
