

3. Create a **Growth by Release Year** line chart using Release Year and Count of Records.

4. Create a **Top 10 Ratings** bar chart using Rating and Count of Records.

5. Create a dashboard named **Netflix Executive Overview**.

6. Set the dashboard size to A4 Landscape.

7. Add the three worksheets to the dashboard.
8. Add the title **Netflix Global Content Catalog Analysis**.

9. Export the dashboard as a PNG image.

10. Configure Page Setup as A4 Landscape.

11. Export the dashboard as a PDF.

Part B – Presentation Mode

Steps

1. Open the Netflix Executive Overview dashboard.
2. Select Window → Presentation Mode.
3. Hover over charts to display tooltips.
4. Click chart marks to demonstrate interaction.
5. Navigate between worksheets using the presentation controls.
6. Press Esc to exit Presentation Mode.

Result

Part C – Publish Dashboard to Tableau Public

Steps

1. Save the completed Tableau workbook.
2. Select File → Save to Tableau Public As.
3. Sign in to Tableau Public.
4. Enter the workbook name Netflix_Global_Content_Catalog.
5. Publish the dashboard.
6. Open the published dashboard and test its interaction.

Result

Part D – Share Dashboard

Steps

1. Hide the underlying worksheets.
2. Keep the Netflix Executive Overview dashboard visible.
3. Save the workbook as a Tableau Packaged Workbook.
4. Use the filename Netflix_Global_Content_Catalog.twbx.
5. Close Tableau and reopen the .twbx file.
6. Verify that the dashboard opens without requiring the original CSV file.

Result

Part E – Enable User Interaction

Steps

1. Create the Tooltip Rating Breakdown worksheet.
2. Add Rating and Count of Records.
3. Insert the worksheet into the tooltip of Content Type Split.
4. Create a Dashboard Filter Action.
5. Configure Content Type Split as the source.
6. Set Growth by Release Year and Top 10 Ratings as target sheets.
7. Create a Go to URL action.
8. Test the interactive filtering and URL action.

Result

The image displays a Tableau Desktop interface with several components:

- Top Panel:** Shows the 'Columns' shelf with 'CNT[netflix_titles.csv]' and the 'Rows' shelf with 'Type'. A 'Content Type Split' dialog box is open, showing a list of fields to be split. The 'Type' field is selected, and the 'Show tooltips' checkbox is checked.
- Dashboard:** Titled 'Netflix Global Content Catalog Anal.', it features a line chart 'Growth by Release Year' showing the count of netflix_titles.csv over time (1996-2022). The chart is split by 'Type' (Movie, TV Show). A 'Content Type Split' dialog box is also open over the dashboard, showing a bar chart of 'Top 10 Rating' and a 'Rating' bar chart.
- Add Filter Action Dialog:** This dialog is used to create a filter action. It shows the 'Filter_by_Content_Type' action, which runs on 'Sheet 1' and targets 'Dashboard 1' (Sheet 1, Sheet 2, Sheet 3). The action is configured to 'Show all values' when the selection is cleared.
- Actions Dialog:** This dialog shows the 'Filter_by_Content_Type' action, which is configured to run on 'Dashboard 1 (Sheet 1)' and target 'All' fields.

Part F – Manage Permissions and Access Control

Steps

1. Create the Simulated_User_Role parameter.
2. Add Executive_Admin, US_Regional_Lead, International_Lead, and Restricted_Guest.
3. Create the RLS_Access_Control calculated field.
4. Apply the calculated field as a Data Source Filter.
5. Select True as the allowed value.
6. Change the simulated user role and observe the dashboard.

Result

The result consists of several screenshots illustrating the implementation of Row-Level Security (RLS) in Tableau:

- Create Parameter Dialog:** Shows the creation of the 'Simulated_User_Role' parameter. The data type is 'String', and the current value is 'Executive_Admin'. The 'Allowable values' are set to a 'List' with four entries: 'Executive_Admin', 'US_Regional_Lead', 'International_Lead', and 'Restricted_Guest'.
- Add to Sheet Context Menu:** Shows the 'Add to Sheet' context menu with 'Show Parameter' selected.
- Calculated Field Editor:** Shows the 'RLS_Access_Control' calculated field with the following logic:

```

      CASE (Simulated_User_Role)
      WHEN "Executive_Admin" THEN
      TRUE
      WHEN "US_Regional_Lead" THEN
      IF (Country) = "United States"
      THEN TRUE ELSE FALSE END
      WHEN "International_Lead" THEN
      IF (Country) != "United States"
      AND NOT (ISNULL(Country))
      THEN TRUE ELSE FALSE END
      ELSE
      FALSE
      END
      
```
- Data Source Filter Setup:** Shows the 'Filter [RLS_Access_Control]' dialog with 'True' selected as the allowed value.
- Edit Data Source Filters:** Shows the 'Edit Data Source Filters' dialog with the filter applied to the 'netflix_titles.csv' data source.

Part G – Evaluate and Optimize Sharing Strategies

Sharing Methods

- .twbx – Interactive packaged workbook.
- .twb – Standard Tableau workbook.
- .pdf – Static document suitable for reports.
- .png/.emf – Static image suitable for presentations.

Optimization Steps

1. Hide unused fields.
2. Remove unnecessary calculations.
3. Use a fixed dashboard size.
4. Use an extracted dataset where appropriate.
5. Save the final workbook as .twbx for independent sharing.

Conclusion

The Netflix dashboard was created and prepared for different sharing methods. The dashboard was exported as PDF and image, displayed using Presentation Mode, prepared for Tableau Public, packaged as a .twbx workbook, and enhanced with interactive filtering, tooltips, URL actions, and simulated role-based access control.
